

## Rejuvra® Herbicide

# Restoring Invasive Annual Grass-Dominated Rangeland for the Long Haul

*Join us April 29, 2022, 9-10:30 a.m. MT for the Rejuvra herbicide webinar.*

More than 10 years ago, Bayer Range & Pasture and universities throughout the west set out to stop invasive plant species like cheatgrass. These devastating invasive annual grasses result in reduced biodiversity and ecosystem resilience, along with diminished forage quantity and quality.

### The Solution: Rejuvra® Herbicide

This rangeland restoration tool is designed to eliminate cheatgrass for the long haul with a fully approved grazing label.

Register for our learning workshop to see how Rejuvra depletes seed banks to stop invasive grasses for long-lasting control.

### Our speakers include:

**Dr. Harry Quicke,**  
Bayer Range & Pasture

**Drs. Derek Sebastian  
and Shannon Clark,**  
Bayer Range & Pasture

**Julie Kraft,**  
Sublette County Weed  
and Pest Supervisor

**Joe Swanson,**  
Boulder County Parks  
and Open Space  
Supervisor

**Justin Hossfeld,**  
Bayer Range &  
Pasture
