The NM Forest and Watershed Restoration Institute is hiring a

GIS Coordinator

NMFWRI is seeking a Geographic Information Systems (GIS) Coordinator with a focus on developing forestry and wildfire mapping applications.

This position will support NMFWRI and our partners on a multi-year, national Infrastructure Investment and Jobs Act (IIJA) GIS project by compiling and managing national geospatial data for federally funded fuels treatment projects and wildfires occurring across jurisdictions.

Duties include:

- Managing project budgets and timelines and assemble reports and materials needed for grant reporting
- Traveling to meet with federal and state partners on behalf of NMFWRI and our partners.
- Collaborating effectively with a diverse team to ensure data sharing, integration, publishing, and quality of spatial databases.
- Leading development of interactive web tools to support project needs.

- Salary Range: \$70,000 – \$86,000
- Regular in and out of state travel
- Possibility for remote/hybrid work
- Need to have strong interpersonal and communication skills and ability to work independently

- Minimum requirements:
- 2 years as GIS program manager OR
- 4 years as GIS project lead
- 5 years working with Esri software
- 2 years building webmaps & apps
