

RANGER SERVICE DOG PROGRAM DISCUSSION ON CANINE PROGRAMS FOR YOUR AGENCY

Are you interested in adding a canine to your resource management agency?

Canine teams save lives; they help locate drowning victims; they help in criminal investigations; they can detect wildlife; locate blood trails, and shell casings... Dog teams are great for public outreach and education. Are you interested in starting a canine program in your agency or just want more information? We will be hosting a virtual discussion on all aspects of a canine program from training to management. We will set-up meeting times to accommodate everyone. Please fill out this Mailchimp form for [more information](#).
